Course Overview

QUALIFICATION OVERVIEW

CPC30326 Certificate III in Carpentry is a nationally recognised vocational qualification providing the practical skills and theoretical knowledge required to work as a carpenter across residential and commercial construction. The course covers setting out, manufacturing, constructing, assembling, installing and repairing structures and products using timber and non-timber materials.

What a carpenter does

Carpenters interpret plans and specifications, prepare and use hand and power tools, frame and construct structures, install fixtures and fittings, and apply safe work practices on construction sites.

Industry demand

The Australian construction industry continues to rely on qualified tradespeople across residential and commercial building sectors. Skilled trades such as carpentry remain an important part of the national workforce, supporting housing, infrastructure and renovation activity across the country.
